

Wintersemester 2024/25**Titel**

Bismuth and its Molecular Compounds: a Stroll through the Useful, the Useless, and the Curiosities

Vortragender

Prof. Dr. Crispin Lichtenberg

Philipps-Universität Marburg, Anorganische Chemie

Abstract

Being the heaviest "non-radioactive" element, bismuth brings about some extremes in the chemical and physico-chemical properties of its molecular compounds. We aim to identify such properties, uncover new characteristics, and exploit them for applications in synthesis and catalysis.

Ort

Chemie, HS1 – Campus Nord, Otto-Hahn-Straße 6

Anfahrt: <http://www.ewit.ccb.tu-dortmund.de/gdch/anfahrt.html>

Zeit

Dienstag, 26.11.2024, 17:00 ct

Kaffeerunde: ab 16.30 Uhr (Raum C2-07-330)

gez. Professor Dr. Andreas Steffen

Gesellschaft Deutscher Chemiker
